ISTRIANA

EVOLUTA

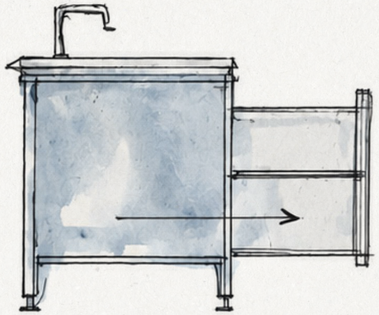

Stone courtyards, painted shutters, olive trees and tables set in the shade. In Istria, much of life happens just outside the house. Preparing a meal, pouring a glass of wine and sitting down together are part of the same familiar rhythm. Istriana by Boris Ružić brings that way of living into an outdoor kitchen. Framed doors, a slender metal structure and an EvolutaCONCRETE worktop give the collection a recognisable character, with proportions that feel at home beside traditional stone architecture.

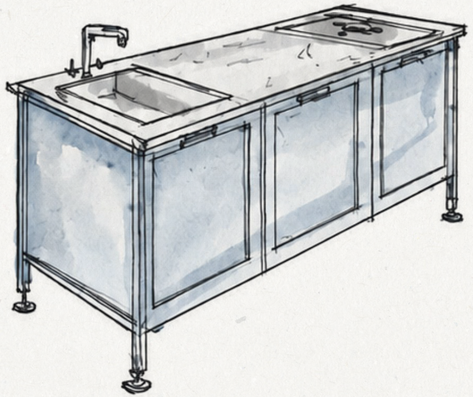

Its design draws on the details of the Istrian house: the repetition of framed panels, the colour of shutters against pale walls, the meeting of practical surfaces and familiar materials. These references are expressed through a clear, contemporary form. Available in three sizes and three colours, Istriana finds its place on intimate terraces, in sheltered courtyards and alongside larger outdoor dining areas. A place to prepare, serve and keep everyday essentials close to the table.

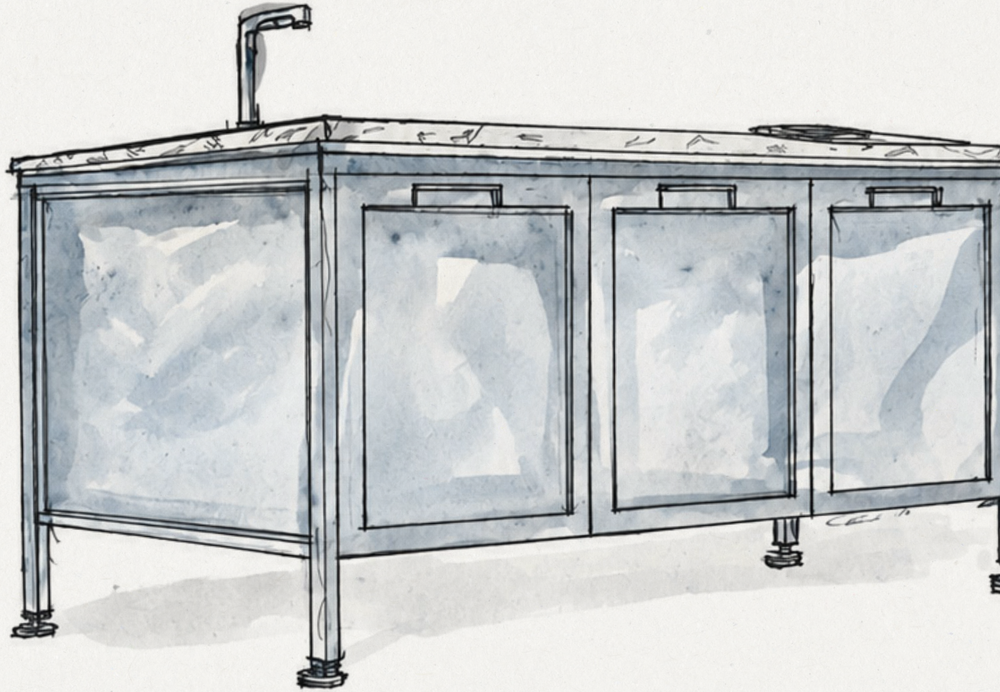

AT HOME IN ISTRIA.

“I imagined Istriana
as a place where
cooking brings people
together.”

The character of Istriana begins with its front. Framed doors create a measured rhythm across the kitchen, giving each size a distinct proportion while keeping the same visual language throughout the collection.

Above them, the EvolutaCONCRETE worktop defines a continuous horizontal line. Below, slender legs lift the cabinetry from the ground, leaving the outline of the kitchen clearly visible against stone paving or a terrace floor.

The relationship between these elements gives Istriana its particular balance. The worktop brings the presence of concrete; the metal frame adds definition; the recessed door panels introduce depth and shadow.

Seen against an old stone wall, the kitchen feels connected to its surroundings. In a more contemporary setting, those same details bring a sense of familiarity. Its character comes from proportion, colour and the way its parts meet.
Everyday life, within reach.

An outdoor kitchen becomes useful through the small things: somewhere to set down ingredients, arrange plates before lunch or keep serving pieces close by. Istriana brings a working surface and enclosed storage into one piece, helping the terrace become a more practical part of the home.

A NEW SETTING.

Three sizes. The same character.

Istriana is available in three widths, with a consistent height of 90 cm and depth of 70 cm. Each model retains the same framed fronts, raised structure and concrete worktop, allowing the size to be chosen around the space and its intended use.

ISTRIANA S
A compact format for smaller terraces and courtyard settings. At 110 cm wide, Istriana S brings the collection's design into spaces where every centimetre matters. Two framed doors keep the front balanced and simple.

ISTRIANA M
The middle size offers a broader surface and a three-door composition. At 160 cm wide, Istriana M sits comfortably alongside an outdoor dining area, providing space for preparation and serving without dominating the terrace.

ISTRIANA L
The widest model gives the design a stronger horizontal presence. Its 210 cm worktop and four-door front suit more generous terraces and courtyard layouts, with additional room for preparing and arranging a meal outdoors.

MATERIALS & COLORS

Three colours of Istria.

Colour connects Istriana to the landscape and architecture around it. Olive green, muted blue and earthy red draw from the region's olive groves, coastline and red soil. Each brings a different character to the same design.

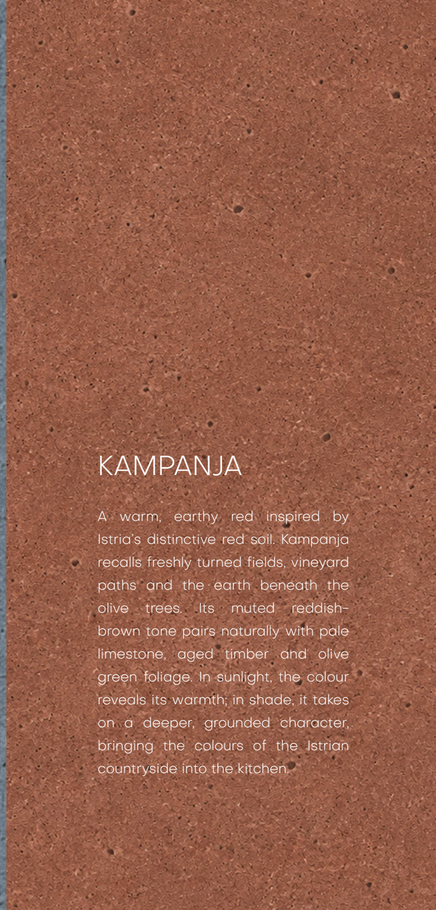

ULIKA

An earthy green inspired by olive leaves and the painted shutters of Istrian village houses. Ulika sits naturally beside limestone, timber and terracotta, connecting the kitchen to the planting around it. Its muted tone gives the framed fronts a quiet depth, becoming softer in sunlight and richer in shade. A familiar colour for sheltered courtyards and terraces overlooking the garden.

MODRA

A muted blue inspired by the coast and the painted details of Mediterranean houses. Against pale stone, Modra gives the kitchen a distinct outline while keeping the overall palette soft. It pairs naturally with light concrete, weathered wood and linen, bringing a cooler note to sunlit terraces. The colour follows the framed fronts through light and shadow, revealing the details of their shape.

KAMPANJA

A warm, earthy red inspired by Istria's distinctive red soil. Kampanja recalls freshly turned fields, vineyard paths and the earth beneath the olive trees. Its muted reddish-brown tone pairs naturally with pale limestone, aged timber and olive green foliage. In sunlight, the colour reveals its warmth; in shade, it takes on a deeper, grounded character, bringing the colours of the Istrian countryside into the kitchen.

CORE MATERIAL
EvolutaCONCRETE®

EvolutaCONCRETE®

EvolutaCONCRETE® is Evoluta's proprietary GRC material, developed specifically for outdoor kitchens and furniture. Based on Glass Fibre Reinforced Concrete, it was refined through years of research as a material that combines strength, precision and tactile depth in a form suited to contemporary outdoor living.

As the foundation of every Evoluta kitchen, it allows for thinner, lighter and more elegant surfaces without compromising durability or long-term performance.

Compared to traditional concrete products, EvolutaCONCRETE® is up to five times more durable, while its advanced composition ensures resistance to UV exposure, thermal shock and lasting colour stability in demanding outdoor conditions. Its fine microstructure and hand-finished character give each piece a calm, natural material presence, while also allowing for sharp detailing, refined edges and a high level of production precision. Sustainable in approach and engineered for all seasons, EvolutaCONCRETE® brings together technical performance and material expression in one lasting architectural surface.

EvolutaCONCRETE®

TESTED PERFORMANCE

COUNTERTOPS

Kitchen countertops are made of EvolutaCONCRETE®, a proprietary glass fibrereinforcedconcrete(GRC)developed by Evoluta and designed for long-term outdoor use, combining structural stability, durability, fire resistance and architectural clarity. Surfaces are treated with food safety hybrid water-based sealer. EvolutaCONCRETE® was tested according following norms and standards:

EN 15388: Slabs and cut-to-size products for vanity and kitchen tops
EN 14617-1:Apparent density and water absorption
EN 14617-2: Flexural strength
EN 14617-5:Freeze and thaw resistance
EN 14617-6:Thermal shock resistance
EN 14617-4: Abrasion resistance
EN 14617-9: Impact resistance
EN 14617-10:Chemical resistance
EN 1186: Materials and articles in contact with foodstuffs
EN 12720:Surface resistance to cold liquids

FRAME

Kitchen frames are made of powder coated stainless steel grade 304.

FRONTS

Kitchen fronts are made od powder coated aluminium alloy

CABINETS

Kitchen cabinets are made of high-pressure laminates (HPL) for furniture applications.
