SOUL

EVOLUTA

SOUL

Quiet volume. Complete presence.

SOUL is the most resolved expression of the Evoluta collection.

It is built around a simple idea: when form, material and proportion are strong enough, very little else is needed.

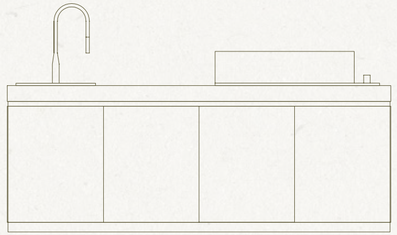

The collection reduces the outdoor kitchen to a clear architectural volume. Surfaces remain uninterrupted, proportions are generous and every element is integrated into the composition.

There are no decorative gestures and no details added simply to attract attention. Instead, SOUL relies on the relationship between mass, light, texture and space. Its presence comes from restraint.

At the centre of the design is EvolutaCONCRETE®, the material that gives SOUL its solidity and unmistakable character.

Its tactile surface and substantial volume create a sense of permanence, allowing the kitchen to sit naturally within contemporary architecture and landscape.

For SOUL, however, concrete is only one part of the composition.

EVOLUTA at

EuroCucina, Milano, 2026.

The collection made its international debut at EuroCucina / Salone del Mobile in Milan in April 2026, where it was presented as OTOK orto, the most complete expression of its island concept. Designed to bring together architectural clarity, refined materials and exceptional functionality, OTOK orto introduced a distinctive approach to outdoor living, where the kitchen becomes a central element of the space.

Glass introduces a completely different quality to the collection.

Placed alongside the visual weight of EvolutaCONCRETE®, it brings transparency, reflection and depth. The two materials are deliberately different, yet neither is treated as secondary.

Concrete defines the body of the kitchen, while glass opens it, allowing light to become part of the design.

The contrast changes throughout the day. In direct daylight, the glass reflects its surroundings and becomes part of the landscape around it. In softer light, its transparency becomes more evident, revealing another layer within the otherwise monolithic form.

This relationship between solid and transparent, weight and light, texture and clarity is one of the defining characteristics of SOUL.

Glass is therefore not introduced as decoration or as an isolated detail. It is treated as an architectural material in its own right, carefully integrated into the geometry of the kitchen.

Together, concrete and glass create a composition that feels substantial without becoming visually heavy.

COLOURS & MATERIALS

Every material has its purpose.

EvolutaCONCRETE®

Worktops and concrete components

EvolutaGLASS

Standard fronts in SOUL

Material

EvolutaCONCRETE®

Material as a defining design element.
The signature material behind Evoluta's architectural identity.

Through colour, texture and finish,
EvolutaCONCRETE® creates a natural connection between the kitchen and its surroundings.

SELECTED COLORS

Material

EvolutaGLASS

Where texture meets light. Exclusive to the SOUL collection, EvolutaGLASS combines the depth and reflections of 4 mm tempered glass with the architectural character of concrete.

Available in three distinctive textures, each creating a different interplay of light and surface.

TESTED PERFORMANCE

COUNTERTOPS

Kitchen countertops are made of EvolutaCONCRETE®, a proprietary glass fibrereinforcedconcrete(GRC)developed by Evoluta and designed for long-term outdoor use, combining structural stability, durability, fire resistance and architectural clarity. Surfaces are treated with food safety hybrid water-based sealer. EvolutaCONCRETE® was tested according following norms and standards:

EN 15388: Slabs and cut-to-size products for vanity and kitchen tops
EN 14617-1:Apparent density and water absorption
EN 14617-2: Flexural strength
EN 14617-5:Freeze and thaw resistance
EN 14617-6:Thermal shock resistance
EN 14617-4: Abrasion resistance
EN 14617-9: Impact resistance
EN 14617-10:Chemical resistance
EN 1186: Materials and articles in contact with foodstuffs
EN 12720:Surface resistance to cold liquids

FRAME

Kitchen frames are made of powder coated stainless steel grade 304.

FRONTS

Kitchen fronts are made of EvolutaGLASS, HPL exterior and stainless steel.

CABINETS

Kitchen cabinets are made of stainless steel and high-pressure laminates (HPL) for furniture applications.
